

BPOE-9 workshop

The ninth workshop on Big Data Benchmarks,
Performance OEmerging
Hardware

Williamsburg, 2018.3.25

<http://prof.ict.ac.cn/bpoe-9>

INSTITUTE OF COMPUTING TECHNOLOGY
中科院计算所

BPOE-9 Opening Remark

Jianfeng Zhan
ICT, Chinese Academy of Sciences
Williamsburg, 2018. 3. 25

中国科学院计算技术研究所
INSTITUTE OF COMPUTING TECHNOLOGY

BPOE Workshop Motivation

- Big data (**AI**): multi-discipline research fields
 - System, architecture, data management, machine learning
- The benchmarks should be consistent across different communities.
 - A bad idea: a hardware accelerator for a naïve deep learning algorithm.

Main Themes

Optimize

Guide

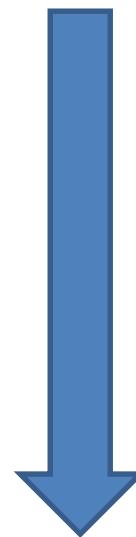

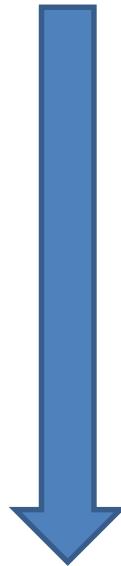

Big Data (AI) Benchmarks

Software
systems

Emerging

Commodity
Hardware

Emerging
Hardware

Nine versions

<u>BPOE-1</u>	October 7, 2013	<u>IEEE BigData Conference</u> , San Jose, CA
<u>BPOE-2</u>	October 31, 2013	<u>CCF HPC China</u> , Guilin, China
<u>BPOE-3</u>	December 5, 2013	<u>CCF Big Data Technology Conference 2013</u> , Beijing, China
<u>BPOE-4</u>	March 1, 2014	<u>ASPLOS 2014</u> , Salt Lake City, Utah, USA
<u>BPOE-5</u>	September 5, 2014	<u>VLDB 2014</u> , Hangzhou, Zhejiang Province, China
<u>BPOE-6</u>	Spetember 4th, 2015	<u>VLDB 2015</u> , Hilton, Waikoloa hotel·Kohala Coast, Hawai'i
<u>BPOE-7</u>	April 3, 2016	<u>ASPLOS 2016</u> , Atlanta, Georgia, USA
<u>BPOE-8</u>	April 9, 2017	<u>ASPLOS 2017</u> , Xi'an, China
<u>BPOE-9</u>	March 25, 2018	<u>ASPLOS 2018</u> , Williamsburg, VA, USA

Many wonderful speakers

- Professor Lizy K John, University of Texas at Austin
- Professor Dhabaleswar K. (DK) Panda, OSU
- Professor Christos Kozyrakis, Stanford
- Dr. Jeff Stuecheli, IBM
- Prof. Ling Liu, Georgia Institute of Technology
- Prof. Josep Torrellas, UIUC
- Prof. Jason Mars, University of Michigan
- Prof. Haibo Chen, Shanghai Jiaotong University

The challenges are remain...

- The modern data center workloads are in Google, Alibaba, Tencent, Facebook....
 - Take-away
 - NO !
 - Only performance model
- What are frequent-appearing units of computation
 - DB: relation algebra
- What is the metric for data-center computing?

BigDataBench 4.0

- <http://prof.ict.ac.cn/BigDataBench>
- Dwarf-based big data and AI benchmarks
 - Identify eight dwarfs
 - Then build big data and AI benchmarks on the basis of eight dwarfs.
 - Simulation benchmarks
 - Speed up the runtime 100X

BPOE-9 program

- **Keynote I: Architecting for Big Data Analytics: Think Dubai rather than Venice.**
Prof. Vijay Janapa Reddi, The University of Texas at Austin
- **Talk I: BigDataBench: A Dwarf-based Big Data and AI Benchmark Suite.** Speaker:
Ms. Wanling Gao, ICT, CAS
- **Talk II: Benchmarking and Characterizing Deep Learning over Big Data (DLoBD) Stacks.** Speaker: Dr. Xiaoyi Lu, Ohio State University.
- **Keynote II: The OS scheduler: a performance-critical component in Linux cluster environments.** Speaker: Dr. Jean-Pierre Lozi, Oracle Labs Zurich
- **Keynote III: Farewell to Servers: Hardware, Software, and Network Approaches towards Datacenter Resource Disaggregation.** Speaker: Prof. Yiyang Zhang, Purdue University.
- **Talk III: BOPS, Not FLOPS! A New Metric, Measuring Tool, and Roofline Performance Model For Datacenter Computing.** Speaker: Dr. Chen Zheng, ICT, CAS
- **Two regular papers from OSU and University of Florida, DELL EMC, Intel Corporation**

Live broadcast

- 欣秀APP
- Light-weight
 - Slides and audio
 - Excluding video.

Next event

- This is the final version.
- Symposium on Benchmarking, Measuring, and Optimizing (**Bench 2018**)
 - co-located with IEEE Big Data. *December 10-13, 2018, Seattle, WA, USA*
 - multi-discipline symposium.
 - Big data, AI, chain-block, mobile robot, IoT
 - Publish benchmarks
 - Verified system ranking.

Thanks
